SECOND CHANCE BEHAVIOR ASSESSMENT:

ASSESSOR: Elena

OBSERVER: Abby

DATE: 3/15/16

EVALUATION COMMENTS:

Independent, soulful guy likes to keep his distance.

- Easy kennel pull. Dog was lying down when assessor approached but quickly stood - ears up, mouth closed, tail at spine level. Ducked briefly but allowed easy leash placement, hesitated briefly then exited kennel. Cautious in kennel runs - trembling when passing barking dogs, occasional muling, legs splayed head low, tail down, body stiff. Similar insecurity during kennel return.
- Walked well on loose leash once outside – head up, body soft, tail wagging.
- Independent and distracted while in play yard. Explored independently and initially ignored assessors. Gently jumped up on fence and whined with passing dogs - body soft, tail up and wagging, ears up. Showed no interest in toys or chase games when assessor attempted to solicit play. Came with coaxing and leaned into petting - body soft, mouth open, tail wagging. Lost interest quickly and became somewhat distant and aloof – remained low in energy, laid down and ignored assessors with subsequent attempts to coax or interact. Somewhat untrusting and kept a watchful eye on assessor. Wary of fast, direct approach - body and mouth stiffened and eyes widened. Flinched and briefly lip curled with direct, overhead reach but recovered quickly and allowed gentle petting from side.
- Stiff and untrusting during handling with sensitivities to handling of mid-back, tail and feet – mouth closed, ears up, tail up and intermittently wagging, eyes averted, body slightly stiff. Head flipped with handling of mid-back and tail. Leaned entire body weight onto paw that assessor attempted to handle, froze and pulled paw back. Softened on second attempt (mouth open, body soft) and pulled paw back gently.
- Would not take treats from assessor or eat from food dish. Food behaviors not assessed.
- Dog avoidant with an insecure demeanor. Followed other dogs but immediately planted feet, muled and backed away when other dogs attempted to approach for face to face – mouth closed, ears up, direct eye contact. Exited and scurried away if other dogs pursued interaction. Eventually approached for polite inspection after prolonged exposure – tail wagging softly, body soft. Jumped backward, muled and spun around with energetic movements from other dog. Insecure but interested in being in close proximity. Note*- attempted to chase cats.

BEHAVIOR

SECOND CHANCE BEHAVIOR ASSESSMENT:

ASSESSOR: Elena

OBSERVER: Abby

DATE: 3/15/16

EVALUATION COMMENTS:

Likely best with polite, friendly dogs. Dog introduction strongly recommended.

- SAFER = 1 2 3 1 X 2
- *Foster / New Hope
 - *Project dog candidate. Adoptable with improvement.
 - *Dog intro required.
 - *No cats.
 - *Recommend ages teens+.

BEHAVIOR

04/27/16 08:30

was very aggressive when apporached kennel door from inside, barking, growling, hard stare, tense.

once approced kennel door from outside demenor completly changed, tail waging, excited to come out, jumping on kennel door.

doesn't seem to like men

lfrear

BEHAVIOR

05/02/16 10:41

Calmed down significantly after exercising for about 15 minutes.

While walking saw another dog, he seemed interested and tried to get to the dog but did not growl or bark. Listened to direction well when told to sit and wait and allowed dog to walk past.

Unsure of how an one on one interaction with another dog would be.

was calm and interacted with a number of people in the office, no aggressive behaviors towards people.

05/08/16 14:25

Walked with A3750279, a female that is about the same size. She is interactive but submissive. Mikey reacted well, he was interested in her but did not bark when approaching, did nip at her nose with first interaction but didn't do it again after being corrected. Walked side by side with her with no aggressive behaviors or trying to dominate.

Very loyal and obedient boy, he always looks up at me for reassurance during walks.

still highly recommend dog intro, especially with more dominant dogs.

lfrear

VET CHECK

05/18/16 14:30 Kennel staff member was concerned that dog's ears smell infected. At time of exam, ears had just been cleaned, so no discharge present, there is no inflammation or swelling noted along the external ear canal AU. Clean ears SID with cleanser starting tomorrow x 3

days: _____, then recheck. kramella

05/19/16 12:10 BAR; no change. sottoman
