Dog was lethargic and hiding under a van. Panting heavily and would not move. Dog was friendly with complainant and citizens helping me catch her. She was able to walk, but very slowly. She has a swollen belly (possibly pregnant or something else?) Dog looks emaciated/can see bones and ribs.

05/27/16 22:28 MSmith

Upon unloading, dog was very weak. She did not make it walking to the kennels. She laid on the ground. We assisted her by using a towel and 2 officers and carried her to the kennel. While in the kennel, she attempted to get up multiple times but could not. We gave her food and water. She made it to the back of the kennel crawling and laid there the rest of the time.

05/30/16 09:13 QAR, laying down in outdoor kennel, looking toward door, did get up and move slowly to indoor kennel, unable to examine.

Abdomen does appear a bit pendulous. Bring to clinic for exam_____. nmayer
